AI / DIGITAL ASSETS / A-POOL

A-Pool

Investing in the digital era

We bring investment plans, deposit management and partner tools together on one platform.

a-pool.org

A-POOL / PLATFORM

An algorithmic approach

01

Market analysis

We build our approach around algorithmic trading, analysing cryptocurrency pairs, price candles and order books.

02

Trade parameters

We use predefined risk parameters, including position size and exit points. Our algorithmic approach supports systematic analysis of market data.

03

One place to manage your account

We provide a personal account for managing balances and deposits. Track accruals, transaction history and security settings in one place.

A-POOL / PLATFORM

Three approaches to the market

01

Trend following

We analyse price, volume and volatility to identify directional movements. A signal is considered alongside position and portfolio exposure limits.

Limitation: sideways markets and reversals can produce repeated losses.

02

Relative value

We compare related assets and consider combinations of long and short positions. Controls include hedge size, combined exposure and funding costs.

Limitation: asset relationships can break down; both positions may lose after costs.

03

Execution

We account for spread, market depth, fees, order size and slippage. Each order is checked against execution conditions.

Limitation: partial fills, delays and exchange outages can create unintended exposure.

A-POOL / PLATFORM

From market data to execution

01 Market inputs

We check price, volume and liquidity. Missing or stale data stops the decision.

02 Model signal

We compare inputs with model conditions. A signal does not bypass portfolio limits or guarantee an outcome.

03 Risk gate

We check position size, total exposure and execution budget. A rejected order is not resubmitted at a larger size.

04 Execution review

We compare the actual price, size and costs with the plan. Breached limits stop new orders until a review.

A-POOL / PLATFORM

Risk control in every decision

Position sizing

We limit the capital allocated to a single position. Smaller positions reduce the impact of an unsuccessful decision.

Combined exposure

We assess positions together: different assets can still move in the same direction under market stress.

Checks and review

We account for liquidity, spread and fees. A risk threshold triggers review, but does not guarantee an exit price or prevent all losses.

An example without leverage

Capital	Position allocation	Position size	Adverse price move	Possible loss	Share of capital
$10,000	10%	$1,000	5%	-$50	0.50%

Excludes fees, funding and slippage. This example is not a recommended allocation. Actual losses can exceed a planned threshold through price gaps, slippage or execution failure.

A-POOL / PLATFORM

From registration to withdrawal

01

Create your account

Enter a username, email and password. If a partner invited you, open their referral link before registering.

02

Open a deposit

Choose a plan, currency and amount. Pay from your wallet using the payment invoice, or use your account balance. Each deposit is tracked separately.

03

Manage your funds

Follow accruals in History. Save your wallet address in Settings and submit requests in Withdrawal. Contact our team through Support.

A-POOL / PLATFORM

Three investment plans

CORE

2.10%

per day / 15 days

Amount range in USD

$10 - $1,000

Total incl. principal: 131.5%

PRO

2.60%

per day / 30 days

Amount range in USD

$1,001 - $2,500

Total incl. principal: 178%

ELITE

3.00%

per day / 45 days

Amount range in USD

$2,501 - $50,000

Total incl. principal: 235%

Daily accruals

CORE, PRO and ELITE accrue every day. Each deposit is tracked separately.

Principal at maturity

Under these plans, the principal returns to your balance at the end of the term. Early withdrawal is unavailable.

Total amount

Total percentages include the initial deposit and accruals over the full term.

A-POOL / PLATFORM

Currencies and networks

01

USDT and USDC

We accept USDT on BEP-20, TRC-20, ERC-20, TON and Polygon. USDC is available on BEP-20 and TRC-20.

02

Other cryptocurrencies

You can also deposit BTC, ETH, TRX, BNB, LTC and SOL. Select your preferred currency when opening a deposit.

03

Match the payment invoice

Send the specified amount in the correct network before the invoice expires. A wrong network or a missing required destination tag can result in a lost payment.

A-POOL / PLATFORM

Deposit limits in USD

Currency	CORE	PRO	ELITE
USDT	$10 - $1,000	$1,001 - $2,500	$2,501 - $50,000
USDC	$10 - $1,000	$1,001 - $2,500	$2,501 - $50,000
TRX	$10 - $1,000	$1,001 - $2,500	$2,501 - $50,000
BTC	$10 - $1,000	$1,001 - $2,500	$2,501 - $50,000
ETH	$10 - $1,000	$1,001 - $2,500	$2,501 - $50,000
LTC	$10 - $1,000	$1,001 - $2,500	$2,501 - $50,000
BNB	$10 - $1,000	$1,001 - $2,500	$2,501 - $50,000
SOL	$10 - $1,000	$1,001 - $2,500	$2,501 - $50,000

One unit of account

Limits for all supported currencies are displayed in USD.

Check before paying

Confirm currency, network, address and the exact amount in the payment invoice.

Separate deposits

Each deposit has its own term and accruals.

A-POOL / PLATFORM

Withdrawals: limits in USD

Currency	Minimum, USD	Maximum, USD
USDT	$1.00	$998,727.00
USDC	$1.00	$999,330.00
TRX	$1.01	$1,005,289.81
BTC	$1.01	$1,006,582.63
ETH	$1.01	$1,003,904.85
LTC	$1.01	$1,009,129.21
BNB	$1.01	$1,008,836.26
SOL	$1.01	$1,007,214.86

No A-Pool withdrawal fee

We charge no A-Pool withdrawal fee. Processing for the listed currencies is automatic.

Your wallet

Funds are sent to the address saved for the selected currency in Settings.

Transaction history

Track request status and transaction IDs in your account. USD amounts depend on currency conversion.

A-POOL / PLATFORM

Our affiliate programme

01

Your personal link

Invite partners using your referral link. People registering through it join your partner structure. An active deposit is required to participate.

02

Commission currency

We credit commissions in the currency in which your partner opened a deposit, without conversion. Rewards are linked to deposits made by invited participants.

03

Tools for partners

We bring your referral link, ready-made banners and statistics by level together in Partners. Track your structure and partner accruals in your account.

A-POOL / PLATFORM

Account and transaction protection

01

Two-factor authentication

Enable Google Authenticator or a similar app. Activation is confirmed by email. Codes protect withdrawals, deposits from balance and changes to passwords, email or wallet addresses.

02

Sign-in protection

We store passwords as hashes and limit sign-in and 2FA attempts. Sessions expire after 30 minutes of inactivity; Keep me logged in preserves access for 30 days.

03

Notices and recovery

We email you about important changes. Recovery links last 24 hours; you can request a new link after 15 minutes. We use HTTPS for the connection.

A-POOL / PLATFORM

Rules of use

01

18+ and one account

You must be at least 18 and provide accurate information. Duplicate accounts and self-referral abuse are prohibited. Violations can lead to account blocking and funds being frozen or confiscated.

02

Participant responsibilities

Follow tax requirements and do not use funds from illegal sources. User mistakes and payment-system failures are not compensated. Force majeure may suspend cooperation.

03

Changes and disputes

Rule changes take effect upon publication. Service terms govern the end of cooperation. Disputes are handled by negotiation and, if no agreement is reached, by a court.

A-POOL / PLATFORM

Personal data and privacy

01

Information we process

We process names, email and wallet addresses, IP addresses, browser details and service usage. Biographical, financial and verification information is also covered.

02

How we use information

We use data to operate our service, communicate, protect transactions, meet requirements and prevent fraud. We do not sell data; sharing with partners is possible when needed or required by law.

03

Cookies and protection

We use cookies for convenience and analytics; you can manage them in your browser. Our data policy may be updated. No protection system is infallible.
